PROGRAM: Tommy Heard - Alabama Ladder. Started in 1989, Alabama Ladder has become a staple in the community. Tommy started by naming all the club members that have contributed to his success throughout the years. Alabama Ladder has grown throughout the years and expanded to a lot of the southeastern states. In addition to ladder sales, they outfit trucks and work vans with ladders, toolboxes, work benches, and storage systems. Tommy then turned the program over to Travis for a brief power point presentation outlining the Decker systems they offer. Their systems elevate your truck bed 12in to include state of the art storage systems and racks. They help workers by offering a better way to store equipment and gear in the back of pick up trucks and work vans. Travis showed a short video on the development of these products. Their materials are industrial strength and are fabricated from start to finish in the USA. In stock and ready to ship now! Tommy and his team had a demo truck in the parking lot for Club members to see and feel their systems in action. Tommy gave an excellent program from start to finish.
